Re: Mandatory Coggins Testing

Due to the recent outbreak of EIA (Equine Infectious Anemia) in Manitoba, The Stanley Agricultural Society Board of Directors is taking the advice of CFIA and asking for proof of a negative Coggins test for all equine animals on the SAS fair grounds from August 11th to 14th, 2017.

The negative test must be dated no earlier than May 28, 2017. This is the date of a confirmed case of EIA in a horse that attended a public event.

If you have any concerns, please contact one of the Stanley Ag Society board members listed below. Thank you for your understanding and continued support.

Sincerely,
Stanley Ag Society Board of Directors
